

BACKGROUND MUSIC PLAYER Model: MUSIC-SD

- Highest quality audio (CD quality).
- Loudspeaker direct connection.
- Auto start after power loss.
- Continuous playback (WAV and MP3 files).
- With microSD memory card.
- Preloaded with "public domain" music.
- USB-microSD adaptor supplied.
- Easy audio files PC-microSD transfer.
- Maintenance free.
- Very small dimensions.

MUSIC-SD is indicated for background music (piped music) in small areas such as elevators, treatment cabins, Spas, waiting rooms or any other application where it is needed an industrial player (24 h./365 days per year) with CD quality and directly connectable to a small loudspeaker (for widest areas it would be necessary to add an amplifier).

Another application is the automatic play of evacuation messages when it is triggering by an alarm system.

With the supplied USB 2.0 adaptor you can transfer from a PC several hours of message or music (WAV or MP3 files) into the 2GB microSD card supplied (8GB supported) without any specific software.

The audio files (music or message) sound in the order as they were transferred. Plays all the songs automatically and infinitely (start by the first when the last end).

Maintenance free because do not have mobile mechanical parts. Start after power loss automatically from the first song. Never it have a "memory loss".

Its small dimensions allow to hide it into the elevator button board or in the same loudspeaker hole.

Preloaded with nearly 3 hours of "public domain" music.

Two years warranty.
